PIAGGIO
Move Beautifully

**Bye-bye
monotony.**

MAKE THE RIDE THE BEST PART OF YOUR DAY

Let's change mobility by mixing technology and art, and good ideas with good design.

Let's show the world that functionality can be fun and practicality can be beautiful.

Let's make the start button a trigger button that every time is pushed, Monday mornings rides, school runs, traffic jams, and last-minute-we-don't-have-bread calls, are transformed into something exciting.

Let's keep elevating even the most mundane ride and making the journey the best part of the day.

ENGINEERING AND **STYLE**

Medley gives you the privilege to move with a different point of view, the ideal solution to beat the traffic with elegance and technology, sprint and safety. Lightweight, manageable and compact, Medley provides an exciting riding experience. Medley expresses the most authentic Piaggio design at the highest levels. The tunnel, practical and with a distinctive design, joins the protective and recognisable front with the slim and sleek rear. The sophisticated combination of satin and chrome elements emphasizes the distinctive details: the central headlight with chrome rings, the LED riding light with an automotive feel, the unique design of the wheel rims with the 6 split spoke motif at the centre. Choose the version in tune with your personality: Medley, elegant and refined, in metallic paint with matt aluminum finish, Medley S, sporty and dynamic, with matt black heat shield and aggressive details or the new Medley Special Edition with graphics that contrast electric blue details with carbon look finishes.

LARGE

CAPACITY

Medley offers the ultimate in comfort and functionality. Compact but ingenious space management, the only one in its category able to accommodate 2 full face helmets in the under-saddle compartment. Opening of these low and ample saddle is electrically controlled. Utmost ergonomics also for the passenger, thanks to the retractable non-slip footrests and flush-saddle handle. The fuel cap positioned on the central tunnel is the smart solution for refuelling without getting off the vehicle. Technology gets on board: instrumentation with digital display, USB jack and PMP (Piaggio Multimedia Platform, optional) system connecting the vehicle to your smartphone enhance everyday mobility.

HIGH TECHNOLOGY

BETTER CONTROL THANKS
TO THE ABS SYSTEM

NEW I-GET ENGINES WITH
START & STOP SYSTEM

i-get
GREEN EXPERIENCE TECHNOLOGY

Safety is a priority for Medley. The 16" front wheel and the 2 disc brakes with standard two channel ABS provide stability and optimum vehicle control on any terrain. The standard anti-theft immobilizer is activated on removing the ignition key, rendering the scooter unusable. Medley mounts the 125 and 150 liquid cooled i-get injection engines, with Piaggio patented Start & Stop system, which switches off the engine during stops and minimizes fuel consumption.
